**DETAILED ACTION**

***Response to Amendment***

1. The Amendment filed 15 November 2007 has been accepted and entered.
2. The finality of the last Office action is withdrawn.

***Allowable Subject Matter***

3. Claims 26-47 and 49 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claim 26, the prior art of reference does not disclose or make obvious, along with the other limitations, a method of detecting radiation comprising: namely, providing a layer of high purity single crystal CVD diamond having at least one of the properties named in parts (i)-(v) of the instant claimed.

Regarding claims 27-46, the balance of claims is found allowable due to their dependence upon an already allowed claim and lacking any technical errors.

Regarding claim 47, the prior art of reference does not disclose or make obvious, along with the other limitations, a detector including a stand-alone, remote or hand-held device comprising: namely, a layer of high purity single crystal CVD diamond having at least one of the properties named in parts (i)-(v) of the instant claimed.

Regarding claim 49, the balance of claims is found allowable due to their dependence upon an already allowed claim and lacking any technical errors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

5. Applicant's arguments, see pages 2-4 of the amendment, filed 15 November 2007, with respect to claims 26 and 47 have been fully considered and are persuasive. The rejection of claims 26-27 and 49 has been withdrawn.

While the use of single crystal diamond is well known in the art for use in particle detection, a high purity layer of single crystal CVD has not been disclosed or made obvious that is so pure as to have the properties required by the instant application.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US 5,216,249 A – Jones discloses a single and polycrystalline diamond detector.

US 4,465,932 A – Burgemeister discloses a diamond detector.

US 4,266,138 A – Nelson discloses a IIb high purity diamond detector.

US 2007/0148079 A1 – Scarsbrook discloses a diamond detector with similar properties but does not qualify as prior art.

US 2004/0182308 A1 – Scarsbrook discloses a diamond detector with similar properties but does not qualify as prior art.

US 2004/0221795 A1 – Scarsbrook discloses a diamond detector with similar properties but does not qualify as prior art.

US 5,210,430 A – Taniguchi discloses a diamond detector.

High Carrier... - Isberg discloses the claimed invention but does not qualify as prior art.

A Neutron Sensor... - Schmid discloses a single crystal diamond with inferior qualities.

High-Voltage... - Twitchen discloses a single crystal diamond with inferior qualities.

Charge Collection... - Isberg discloses a single crystal diamond with equivalent  $\mu\tau$  properties but does not qualify as prior art.

Charge Carrier... - Pernegger discloses a single crystal diamond with inferior qualities.
